Grain Market News

WEEKLY SUMMARY AND STATISTICS

GRAIN DIVISION AGRICULTURAL MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 8 No. 26 Washington 25, D. C. July 1, 1960

GRAIN MARKETS WEAKEN

Cash grain markets softened during the week ended June 30. Interest generally centered on new-crop grains with the good reports of crop conditions coming in from the country.

Weakness in winter wheat was mostly a further adjustment to a new-crop basis. Harvesting was active over a wide area of the winter wheat belt, and the first red wheat arrived at some markets this week. Winter wheat yields and quality were good. Active domestic and export demand failed to keep pace with increased offerings, however, and there were reports of a growing scarcity of storage space. Softness in spring wheat prices at Minneapolis reflected slow flour sales and the lack of commitments from buyers who were waiting for further crop news. White wheat worked a little lower in seasonally slow trading at Portland. Rye, influenced by lower futures prices, favorable crop prospects, and additional movement of rye from Canada to the U. S., weakened at Minneapolis.

Feed grains generally softened in rather slow trading. Corn offerings were relatively light, but buyers hesitated to accumulate supplies prior to the holiday week end. Oats and barley found narrow demand from domestic feed interest and slow export inquiry. Grain sorghum prices held firm behind renewed domestic and export interest in Texas but lost 4¢ per cwt. at Kansas City.

Soybeans finished about unchanged. Trading was slow as continued heavy exports were counterbalanced by smaller crushing and easiness in soybean oil and meal markets. Flaxseed lost 5¢ per bushel at Minneapolis with little interest shown by buyers.

Average farm prices, parity and support rates	14
Soybean prices compared with soybean oil and meal prices	14
Grains - U. S. imports, May	15

NEW PROVISION IN P. L. 480 PURCHASE AUTHORIZATIONS: A new provision to assure that all qualified U. S. suppliers have an opportunity to compete for business is to be incorporated in Title I, Public Law 480 purchase authorizations. This provision points out that purchases under an authorization may be made through negotiation with a supplier or suppliers of the importer's choice, or by requesting the submission of competitive offers.

GRAIN IMPORTS: Imports of wheat, July through June, including the quota of about 800,000 full duty wheat, totaled around 7.1 million bushels compared with 7.4 million during the 1958-59 season. Imports of barley last season, on the basis of official data for eleven months and Canadian shipments during June, totaled 13.7 million bushels. This compares with 11 million imported the previous season. Less than 2 million bushels of oats were imported last season as against 3.3 million in 1958-59 and 28.4 million the 5-year average. About 4.2 million bushels of rye were imported last season, with the quota for 1960-61 fixed at about 2.4 million bushels.

Feed grain payment-in-kind export bids, June 24-30, 1960

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

4/ The monthly average price is the simple average of the daily closing prices.

MIXED TREND RULES GRAIN MARKETS

Cash grain markets showed a mixed trend in quiet trading during the holiday-shortened week ended July 7. Day-to-day price changes were influenced mostly by crop and harvest reports and supply-demand conditions at individual markets.

Winter wheat firmed up in the hard wheat area but weakened in the soft wheat area. Harvest of winter wheat was about over in Texas and southern Oklahoma but was in full swing in Kansas and either underway or ready to get underway in the rest of the belt. However, much of the new crop was moving into loan and a shortage of storage space was developing. This together with good domestic and export demand gave strength to hard wheat. Weakness in soft wheat was attributed largely to increased harvest activity. Spring wheat prices softened and durum held steady at Minneapolis as demand lagged in view of favorable crop prospects and nearness of the harvest. White wheat was generally unchanged at Portland where domestic and export demand was limited. Rye weakened in Minneapolis as harvest of the new crop drew near.

Corn, influenced by good demand for light offerings and sluggish development of the new crop, finished 1-4¢ per bushel higher at major markets. Oats and barley prices closed about unchanged except for a little strength on malting barley. Offerings were light but ample for demand. Grain sorghum prices firmed up as good demand readily absorbed limited offerings.

Soybeans finished about 2¢ per bushel higher. Offerings from the country picked up a little, but demand was aggressive. Processors, encouraged by better oil sales, actively competed with exporters for available supplies. Flaxseed found less demand and prices dropped 12¢ per bushel in Minneapolis.

NATIONAL AVERAGE SUPPORT PRICE FOR 1960 CROP-WHEAT ... will be $1.78 per bushel. This is an increase of 1¢ per bushel above the "advance" minimum price for this year's crop announced in July 1959. Minimum terminal and county rates are being uniformly increased 1¢ per bushel for the commercial wheat-producing area.

"ADVANCE" MINIMUM SUPPORT PRICE FOR 1961-CROP WHEAT ... has been announced at $1.78 per bushel, if wheat marketing quotas are approved by producers in the July 21 referendum. The advance support price reflects 75 percent of the estimated parity price for wheat as of the beginning of the 1961-62 marketing year July 1, 1961. This percent-of-parity level of support is indicated on the basis of estimated wheat supplies (196.1 percent of the normal supply) available for the marketing year.

GRAIN EXPORTS ...continued at a high level during June. Around 40 million bushels of wheat were exported during the month on the basis of inspections for export. Wheat and flour exports for the July-June year now total 511 million bushels, assuming that June flour exports about equal May's rate. This compares with 442 million in 1958-59 and the record 549 million in 1956-57. Oats and barley exports, mainly through the St. Lawrence Seaway, totaled 5 million and 10 million bushels, respectively, during June. Oats exports for the crop year now total nearly 44 million bushels as against 30 million the previous year, while exports of 112 million bushels of barley were about the same as a year earlier. Around 20 million bushels of corn were exported in June, bringing the total since October 1 to 160 million or about the same as the previous season. Soybean exports on the basis of inspections totaled 14 million bushels last month. This brought the October-June total to 112 million -- about 24 million above the same months of 1958-59.

Feed grain payment-in-kind export bids, July 1-7, 1960

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

4/ The monthly average price is the simple average of the daily closing prices.

COMMODITY CREDIT CORPORATION INVENTORY AND SALES
(All data in 1,000 bushels except grain sorghums in 1,000 cwt.)

Estimated CCC non-committed inventory for week ended June 30, 1960

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

*See page 11 for U. S. grains inspected for export from Canadian ports.

WEEKLY SUMMARY AND STATISTICS

GRAIN DIVISION AGRICULTURAL MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 8 No. 28 Washington 25, D. C. July 15, 1960

WHEAT STRONGER - OTHER GRAINS LITTLE CHANGED

Wheat markets firmed up during the week ended July 14. Most other cash grain prices seesawed within a narrow range and closed little different from the previous week. Trading was more active for wheat but remained listless for most other grains.

Winter wheat finished around 2-5¢ per bushel higher at major markets, reflecting good demand for light offerings. Harvesting made good progress. However, with current prices generally below effective support levels, a considerable amount of new-crop wheat went into loan. Spring and durum wheat held firm in Minneapolis. Offerings were light but so was demand as flour sales remained slow and export interest was lacking. White wheat remained unchanged in moderately quiet trading at Portland. Rye, influenced mainly by improved crop prospects, weakened in Minneapolis.

Feed grain markets were on the dull side, with corn, barley and grain sorghums closing a little firmer and oats a little weaker. Offerings were relatively light, but demand was only fair to slow as buyers generally awaited new-crop movement. Grain sorghums were an exception and enjoyed very active demand.

Soybeans ruled firm as weakness in the meal market was offset by good export demand for oil and beans. Flaxseed lost 5¢ per bushel in Minneapolis as buyers showed little interest in view of extremely slow sales of linseed meal and oil.

CROP PROSPECTS . . . based on July 1 conditions, call for a 1960 corn crop of 4.1 billion bushels. This is second only to the previous year's record crop of 4.4 billion bushels and is well above the 3.3-billion bushel 1949-58 average. Production of all wheat in 1960 is now estimated at slightly over 1.3 billion bushels -- second only to the record 1.5-billion-bushel 1958 crop. Wheat production also is nearly a fifth larger than last year and almost a fourth larger than average The 1960 oats crop is expected to total a little over 1.1 billion bushels, or 6 percent above last year's small production but 12 percent below the 10-year average. Soybean acreage for all purposes was estimated at 24.4 million acres on July 1. This is 5 percent above 1959 and only slightly below the record acreage of 1958.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

4/ The monthly average price is the simple average of the daily closing prices.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

CASH GRAIN MARKETS WEAKEN SLIGHTLY

Grain markets generally weakened during the week ended July 21. Good growing weather for corn and harvesting small grain crops in the Midwest States caused some downward pressure on cash prices. Buyers were not inclined to take on supplies until the marketing attitude of producers could be determined. However, a heat wave in the Dakotas, with 108 degrees at Bismarck and 105 degrees at Rapid City brought strength to the futures market. It was generally felt, a continuation of the heat wave would result in damage to spring wheat and flax. At Winnipeg, flax futures advanced as much as 6¢ per bushel. The heat wave was forecast to move southward in the next day or two and fear of damage to the growing corn, soybeans and oats was reflected by a stronger market at the close. In the Pacific Northwest, dry hot weather hastened maturity of crops. A railroad announcement, proposing reduced rail rates on grains moving to the West Coast from Oregon, Washington and north Idaho points was reflected in cautious buying as well as causing a firm holding tendency by producers.

Cash winter wheat prices were 1¢ higher to 3¢ lower. Spring wheat was steady to 3¢ lower at Minneapolis and durum wheat dropped 2¢ reflecting slow flour sales. White wheats were firm at Pacific Coast markets as both domestic and export buying absorbed the light offerings. At Minneapolis, No. 2 rye dropped 4¢ influenced by the rapidly expanding harvest. Sixty percent of the crop was reported ripe in South Dakota.

Feed grain markets, except barley, weakened with prices down 1-3¢ at most markets. Malting barley dropped 4-6¢ at Minneapolis. Western barley was 2-3¢ higher at Portland reflecting good domestic feeder demand and improved export interest while country selling continued light. Grain sorghums influenced by increased offerings dropped 4-5¢ per cwt. at Kansas City but gained 1¢ at Fort Worth.

Soybeans were firm to slightly higher. Exports totaled over 4 million bushels last week. Flaxseed remained unchanged at Minneapolis as buyers awaited future crop developments.

National Farm Safety Week - July 24-30

Special Features

	Page
Feed grains - payment-in-kind export bids	2
Grains - amount under price support	7
Wheat, rye, corn, oats, barley, grain sorghums, soybeans and flaxseed - amount under price support by states	8-15
Soybeans - inspected receipts by grades	16

Producers Approve Marketing Quotas: Preliminary returns from a referendum held Thursday (July 21) in the 39 State commercial wheat-producing area for 1961 show that 87.3 percent of the farmers voting favor marketing quotas on 1961-crop wheat. Last summer, 80.8 percent of the farmers voting in a referendum voted favorably on marketing quotas for the 1960 wheat crop.

Nearly 4.2 Billion Bushels of Space Signed Under New Grain Storage Agreement: Commercial warehousemen with facilities totaling more than 4 billion 170 million bushels of space had through July 15 signed the new Uniform Grain Storage Agreement for the storage of price-support commodities during the 1960-61 year. The preliminary total already offered under the new agreement is more than 98 percent of the 4 billion 240 million bushels of grain storage capacity reported under the former agreement on June 29, the last day it was effective. Terms of the new agreement, including revised storage rates became effective June 30, 1960.

P.L. 480 Grain Purchase Authorizations Issued to Israel: Authorization 16-73 provides for the purchase of $2,165,000 worth (approximately 2,000,000 bushels) of yellow grain sorghums. Authorization 16-74 provides for the purchase of $1,526,000 worth (approximately 1,200,000 bushels) of barley.

P.L. 480 Agreement With Poland: An agreement between the United States and Poland providing for sale of $130 million worth (including certain ocean transportation costs) of U.S. agricultural commodities for zlotys (Polish currency) under Title I of Public Law 480 was announced July 21.

The grain commodities included in this agreement were: Wheat (about 37 million bushels) for $61.5 million, Barley (about 11.5 million bushels) for $12.5 million, Corn (about 2 million bushels) for $2.5 million and Grain Sorghums (about 4 million bushels) for $4.5 million. The value of the grain commodities totaled $81.0 million. This agreement in furtherance of the U.S. Food-for-Peace program, brings the total value of food and fiber included in Title I programs with Poland to $365 million. Sales will be made by U.S. private traders, and purchase authorizations will be announced later.

Feed grain payment-in-kind export bids, July 15-21, 1960

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

4/ The monthly average price is the simple average of the daily closing prices.

1/ No program.

NOTE: Availability period for putting corn under reseal has passed. New reseal programs for corn begin after July 31.

Through June 30, farmers had placed nearly 12.8 million bushels of 1960-crop wheat under price support. Of this, 2.2 million were put under support in Kansas, 7.1 million in Oklahoma and 2.9 million in Texas. Through June, about 2.1 million bushels of 1960-crop barley were under support with the most of it in Arizona and California. Of the barley total, about 1.5 million bushels were put under recourse loan under the provisions of the $50,000 limitation in the amount of nonrecourse price-support permitted on 1960 crops. There were no recourse loans on wheat or oats. Farmers had also put 191,025 bushels of 1960-crop oats under support.

1/ Carlot receipts have been converted to bushels on the basis that 1 carlot equals 1,750 bushels. 2/ Of the June receipts, 900 bushels were Black and the remainder Yellow soybeans. Inspections of soybeans in June included 8,399,078 bushels as cargo lots, 2,794,431 bushels as truck receipts, and the balance as carlot receipts.

Based on reports of inspections by licensed grain inspectors at all markets.

Grain Market News

WEEKLY SUMMARY AND STATISTICS

GRAIN DIVISION AGRICULTURAL MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 8 No. 30 Washington 25, D. C. July 29, 1960

MOST GRAINS WEAKEN

Most cash grain markets continued to weaken in dull trading during the week ended July 28. However, except for flaxseed, prices generally moved within a narrow range. Weather and crop reports played an important role in the market for some grains.

Winter wheat prices, although little different from a week earlier, closed on a weak note at principal markets. Harvesting had reached or passed its peak, but with cash prices generally below effective support, farmers continued to hold their wheat or put it into the loan program. However, the market was steadied to some extent by the shortage of boxcars and storage space and good domestic and export demand for available offerings. Spring wheat led the downturn with losses of 4-6¢ per bushel at Minneapolis. Losses were attributed to the expanding harvest and offerings of new-crop wheat that were greater than the trade could absorb in view of slow domestic flour business. Durum wheat, however, held steady behind good demand for meager offerings. White wheat held firm at Portland, influenced by improved export demand, continued slow country marketings, and cash prices that were 5-6¢ per bushel above effective support. Rye held steady at Minneapolis as new-crop offerings moved readily into commercial channels at the present price level. Harvesting was active in the Dakotas.

Corn finished unchanged to 5¢ per bushel lower at principal markets. Demand was good but buyers were more selective and kept their eyes on the weather. The growing crop is making up some for lost time and tasseling has developed in one-fifth to one-third of the Corn Belt. However, rains are needed for continued good development as the crop enters the crucial stage. Oats weakened under pressure from increased new-crop offerings as harvesting expanded rapidly. Barley ruled firm with good demand, particularly from exporters, for scant new-crop offerings. Grain sorghum prices finished 3-4¢ per cwt. lower, reflecting the lack of demand and nearness of new-crop harvesting.

Soybean prices climbed 1-2¢ per bushel. Strength was attributed to the tight selling policy in the country, smaller than expected July 1 stocks, a better oil and meal market, and threats of crop damage from heat waves. Flaxseed, influenced by high temperatures and the need for moisture in U. S. and Canadian producing areas, advanced 28¢ per bushel in Minneapolis.

P. L. 480 AGREEMENT WITH IRAN ... providing for the sale of $3,690,000 worth, or about 1.8 million bushels, of wheat for rials (Iranian currency), was announced July 26. Sales will be made by U. S. private traders.

P. L. 480 PURCHASE AUTHORIZATION ISSUED TO INDIA ... to finance purchase of $3,980,000 worth of wheat (about 69,600 metric tons) or wheat flour from U. S. suppliers, was announced July 22. Authorization No. 39-45 provides for purchase of white wheat of the subclasses hard white, soft white, white club, and western white wheat, Grade U. S. No. 2 or better, in bulk, or wheat flour (excluding flour milled from red durum and durum wheat. Durum wheat includes the subclasses hard amber durum, amber durum, and durum). Sales contracts made between July 29 and November 30 will be eligible for financing. Delivery will be to importer f.o.b. vessel, ports of exportation, in the case of wheat, or f.a.s. vessel, U. S. ports, in the case of flour. Shipments may be made between July 29 and December 31, 1960.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

4/ The monthly average price is the simple average of the daily closing prices.

COMMODITY CREDIT CORPORATION INVENTORY AND SALES

UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 8 No. 31 Washington 25, D. C. August 5, 1960

GRAIN MARKETS MIXED

Grain markets were mixed during the week ended August 4. Winter wheat, barley and flaxseed strengthened, while other grains weakened. Weather, crop and international news had considerable influence on cash prices.

Winter wheat advanced 2-5¢ per bushel, reflecting good demand for lighter offerings. Harvesting moved rapidly toward completion, but with cash prices around or below effective support levels, farmers continued either to hold their wheat or put it into loan. Spring wheat dropped 4-9¢ at Minneapolis as offerings from the new crop were stepped up and buyers adjusted prices downward. Durum wheat, however, was unchanged as buyers kept their eyes on the hot, dry weather in major producing areas where lighter test weights and reduced yields were reported. White wheat was generally unchanged at Portland as larger offerings from the country were readily absorbed by heavy export bookings. Rye was unchanged in narrow trading at Minneapolis.

Corn and oats markets weakened slightly in slow trading, with offerings about matching current demand. Corn was rapidly tasseling and setting ears in the Corn Belt, but development continued to lag behind last year and normal. Barley ruled firm, particularly malting type at Minneapolis, as demand held up fairly well in the face of increased marketings from the new crop. Grain sorghum prices went down 7¢ per cwt. at Fort Worth but ruled firm at Kansas City. Weakness in Texas was attributed to larger offerings and poor demand, while light offerings satisfied demand in Kansas City as buying interest narrowed.

Soybeans finished unchanged to a little weaker. Trade interest centered on such influences as the possibility of new farm legislation, private crop estimates, and carry-over stocks at the end of next month. Country movement of soybeans, meanwhile, was no better than moderate. Flaxseed drew further support from hot, dry weather in U.S. and Canadian producing areas, and firmed up at Minneapolis.

CANADIAN ESTIMATES FOR 1960-CROP GRAIN ACREAGE ... indicate that Canada's farmers seeded 23.2 million acres to all classes of wheat; 11.1 million acres to oats; 7.4 million acres to barley; 2.8 million acres to flaxseed; 543,000 acres to rye; 514,000 acres to corn; and 256,000 acres to soybeans. Seeded acreage of most grains for 1960 was up from 1959. Oats and barley acreages, however, were down.

P. L. 480 AGREEMENT WITH UNITED ARAB REPUBLIC (EGYPT) ... announced this week provides for sales by U. S. private traders of $58.2 million worth or about 33 million bushels of wheat or wheat flour.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

4/ The monthly average price is the simple average of the daily closing prices.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

WEEKLY SUMMARY AND STATISTICS

GRAIN DIVISION AGRICULTURAL MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 8 No. 32 Washington 25, D. C. August 12, 1960

GRAIN MARKETS LITTLE CHANGED

Cash grain prices fluctuated within a narrow range and generally closed little changed for the week ended August 11. Trading was quiet, with interest centering on weather news and the August 10 crop report.

Winter wheat markets softened. Receipts were rather light in view of good domestic and export demand, but this was offset by the estimate of a 1.1-billion bushel winter wheat crop -- second only to the record 1958 crop. Another weakening influence was the prospects of heavier loading out from the country in order to make room for new-crop feed grains. Spring and durum wheat ruled firm at Minneapolis as the weakening effect of heavier receipts from active harvesting areas was more than offset by reduced crop prospects as a result of hot, dry weather. White wheat held about steady at Portland as good export demand continued to absorb moderate selling from the country. Rye held firm at Minneapolis.

Corn finished generally unchanged from a week earlier at most markets. Prospects for the second largest crop of record - 4.1 billion bushels - had little effect on the cash market. Country offerings remained light, but late reports indicate some cribbed corn now going through shellers has picked up moisture from the humid weather. Oats and barley markets showed little change. Harvesting rapidly neared completion. Offerings, although relatively light, appeared to satisfy current demand. Grain sorghum prices declined 2-3¢ per cwt. as increased offerings found very little demand. Harvesting of this year's crop, estimated at 539 million bushels nationally, was well under way in Texas.

Soybean prices edged up 2-4¢ per bushel in a market that was tied closely to weather, crop and international news. August 1 forecast of a 548-million-bushel 1960 soybean crop was 2 percent above last year and the second largest of record. Weather favored growing conditions in producing areas, but at the same time country selling continued light. Demand was encouraged to some extent by active crushing and new highs in the soybean oil futures market. Flaxseed dropped 5¢ per bushel in Minneapolis as harvest of the larger crop was about ready to move into full swing.

MINIMUM COUNTY PRICE SUPPORT RATES FOR 1960-CROP CORN ... were announced this week. Rates are based on the 1960 minimum national average support price of $1.06 per bushel. They reflect a 6¢-per-bushel reduction from 1959 rates due to the lower 1960 support price. Minimum rates will not be reduced but may be increased if the final 1960-crop corn support price, as determined October 1, is higher than the minimum price announced in February.

PRICE SUPPORT ELIGIBILITY FOR 1960-CROP BARLEY ... was broadened this week to include grade No. 5 barley or No. 5 garlicky barley.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

4/ The monthly average price is the simple average of the daily closing prices.

Grain Market News

WEEKLY SUMMARY AND STATISTICS

GRAIN DIVISION AGRICULTURAL MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 8 No. 33 Washington 25, D. C. August 19, 1960

GRAIN MARKETS REMAIN MOSTLY STEADY

Cash grain markets generally showed little or no change during the week ended August 18. Trading continued narrow.

Winter wheat closed not more than a penny a bushel above or below a week earlier. Demand was fairly good but offerings were light as farmers were not marketing wheat in any sizable volume. Spring wheat lost 1-5¢ and durum wheat was down 3-4¢ at Minneapolis as offerings increased with the active harvesting pace. White wheat held firm at Portland, reflecting slow selling in the country and a firm buying interest. Rye weakened at Minneapolis.

Feed grains finished generally unchanged for the period with little in the weather or other news to stir the trade. Offerings of corn remined light, but they were about equal to present trade needs. Most of the Corn Belt acreage has completed tasseling and the more mature corn moved into the dough stage. Trading in oats and barley was light. Grain sorghum offerings were light but about on a par with demand. Rains delayed early harvesting activity but the crop is reported in mostly good condition.

Soybeans eased off 2¢ per bushel at Chicago but held steady at Minneapolis. The decline was due to a large extent to weakness in the soybean meal market. Country marketings remained light, but traders appear satisfied that sufficient old-crop beans are available to supply all needs before the new-crop harvest. Crop prospects are generally good but some traders believe that lateness may result in frost damage. Flaxseed was unchanged at Minneapolis. Harvesting gained momentum, and late flax in North Dakota appears to be holding up very well despite a moisture shortage.

Wheat flour and corn meal shipments under Section 416	9
Storage capacity of elevators and warehouses	10
Wheat - amount under price support by States	11
Grains - amount under price support	12

STOCKS OF GOVERNMENT-OWNED GRAIN ALONG EASTERN SEABOARD ... will be increased materially as part of the overall program of developing civil defense "readiness," the USDA announced this week. Wheat in idle maritime ships will be at least doubled -- from 7.4 million bushels in the Hudson River and 7.3 million bushels in the James River to 15 million bushels or more at each anchorage. In addition, minimum stocks of CCC food and feed grains in commercial storage at less vulnerable locations in Eastern States will be increased by about 5 million bushels. The increase in government-held grain stocks along the Eastern Seaboard will run between 20 and 25 million bushels. Grain which is shipped to the area will come primarily from heavy producing States of the Middle West. As storage stocks there are moved out to make room for new harvest this year, they will be channeled to the east as necessary to provide the additional reserve supplies.

PURCHASE AUTHORIZATIONS RECENTLY ISSUED TO U.A.R. (EGYPT) ... will finance the purchase of $17,485,000 worth - about 300,000 metric tons - of wheat from U. S. suppliers under Title I of Public Law 480.

TITLE I, P. L. 480 EXPORTS ... of agricultural commodities during July 1960 totaled 762,000 metric tons, the Foreign Agricultural Service reported. Included in this total were: 23 million bushels of wheat, 77,100 cwt. of wheat flour, 2.1 million bushels of corn, and 8,000 bushels of barley.

FINAL RESULTS OF WHEAT REFERENDUM TALLY ... showed that 87.4 percent, or 156,134, of the 178,718 farmers in the 39-State commercial wheat producing area voted for marketing quotas for the 1961 wheat crop. Since approval was by more than the necessary two-thirds of the farmers voting in the referendum, marketing quotas will be in effect for the 1961 wheat crop. This marks the tenth time farmers have voted favorably on marketing quotas for wheat.

Feed grain payment-in-kind export bids, August 12-18, 1960

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

4/ The monthly average price is the simple average of the daily closing prices.

COMMODITY CREDIT CORPORATION INVENTORY AND SALES
(All data in 1,000 bushels except grain sorghums in 1,000 cwt.)

WEEKLY SUMMARY AND STATISTICS

GRAIN DIVISION AGRICULTURAL MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 8 No. 34 Washington 25, D. C. August 26, 1960

GRAIN MARKETS GENERALLY UNCHANGED OR HIGHER

Cash grain markets featured higher prices for winter wheat, grain sorghums and soybeans during the week ended August 25. Markets for other grains generally showed little or no change in moderately slow trading.

Winter wheat was stimulated by active demand for light offerings and prices closed mostly around 2-4¢ per bushel higher. Other strengthening influences were the 127 million bushels of new-crop wheat already put under price support, slow selling in the country, and less pressure on interior elevators for space to store the upcoming corn and sorghum crops. Spring wheat trade operated under the handicap of a strike in the Duluth-Superior area. Receipts at Minneapolis on Monday were the largest in 79 years, and buyers lowered bids in view of congested track conditions and heavy offerings. However, settlement of the strike near the close gave the market a lift and prices closed only slightly below a week earlier. Durum wheat, on the other hand, failed to make a recovery and finished 6-7¢ lower. White wheat was unchanged at Portland with light offerings finding moderate export demand but slow domestic mill interest. Rye weakened in dull trading at Minneapolis.

Corn, oats and barley markets fluctuated within a narrow range and closed generally unchanged. Trading was limited with offerings light but ample for slow to fair demand. The corn market was bolstered to some extent by CCC takeover of corn on which loans matured August 1 and its policy of discontinuing sales of off-grade corn. Most of the crop in the Corn Belt developed favorably and started moving into the denting stage. However, there is still concern that lateness of the crop holds the possibility of frost damage before picking time. Grain sorghum prices advanced 7-14¢ per cwt. at Kansas City and 6¢ at Fort Worth as limited offerings fell short of very active demand. Wet weather delayed harvesting in Texas and this also had a firming influence on cash prices.

Soybeans went up 3-4¢ per bushel at Chicago and held steady at Minneapolis. Offerings remained light as country selling continued at a low ebb. Strength stemmed mainly from relatively heavy exports of soybeans and improved export interest in soybean meal. Flaxseed held unchanged at Minneapolis with bookings fair at times.

Special Features

	Page
Feed grains - payment-in-kind export bids	2
Wheat supplies in four exporting countries	7
Soybeans and flaxseed - supply and distribution, monthly	8

CANADIAN GRAIN STOCKS ... totaled 760.3 million bushels on July 31, the Dominion Bureau of Statistics reported. Carryover stocks of 536.2 million bushels of wheat were slightly below last year's revised estimate of 549 million bushels. Stocks of rye, at 6.8 million bushels, were 14 percent smaller than the 7.9 million a year earlier. July 31 stocks of oats in all positions, at 92.5 million bushels, were 22 percent smaller than the previous year's carryover of 119 million bushels. Stocks of 120.1 million bushels of barley were down 6 percent from the 128.2 million held on July 31, 1959. Stocks of 4.7 million bushels of flaxseed were well below last year's 6.5-million-bushel carryover.

GRAIN INSPECTION FEES ... will be increased, effective September 1, for appeal inspections of grain and for overtime charges in connection with these inspections. Fees which are now $8 per car will be raised to $9 per car, and cargo grain fees will be increased from $2 per thousand bushels to $2.25 a thousand. Comparable increases will be made in fees for appeals on trucklots and on submitted samples. Overtime charges on appeals on grain, authorized by the United States Grain Standards Act, will be increased from $5.80 an hour to $6.40 an hour per man.

WHEAT SUPPLIES ... in the four principal exporting countries (United States, Canada, Argentina and Australia) on July 1 totaled 3.9 billion bushels. This was about the same as a year earlier with larger supplies in the United States and Australia offsetting smaller supplies in Canada and Argentina. Exports of wheat and flour from the United States during July 1959-June 1960 reached 506.6 million bushels, 64.5 million more than a year earlier. Exports of 279.7 million bushels from Canada, however, ran 20.7 million below a year ago. Argentine exports were down also and at 77.2 million bushels were 24.6 million below the previous year. Australian exports of wheat and flour during July 1959-June 1960 showed a sharp increase. They reached 121.5 million bushels, or 46 million more than the same period a year earlier.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

4/ The monthly average price is the simple average of the daily closing prices.

COMMODITY CREDIT CORPORATION INVENTORY AND SALES

WEEKLY SUMMARY AND STATISTICS

GRAIN DIVISION AGRICULTURAL MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 8 No. 35 Washington 25, D. C. September 2, 1960

BREAD GRAINS FIRMER - OTHER GRAINS WEAKER

Wheat and rye prices climbed a little higher but markets for other cash grains were steady to mostly lower for the week ended September 1.

Winter wheat closed unchanged to 3¢ per bushel higher behind good demand for light offerings. Country selling continued at a low ebb even though cash prices were near or above effective support rates. Many farmers, with tax reasons in mind, were reported holding their wheat. Although country elevators stepped up sales to release space for oncoming fall grains, mills had difficulty locating enough wheat to take care of their immediate needs. Spring and durum wheat held firm with fairly good demand for smaller receipts. White wheat ruled steady at Portland where country selling was slow and exporters readily absorbed daily offerings. Rye, influenced by smaller receipts and acceptance of some fair-sized lots under the Payment-in-Kind export program, finished 3-4¢ per bushel higher at Minneapolis.

Weakness in corn was attributed to reports of hot, dry weather that will hasten maturity, new-crop harvesting in isolated areas, and the strike of elevator workers in Chicago. Oats and barley trading remained light and prices softened slightly. Offerings were light but so was demand. Grain sorghum prices showed the most change, dropping 4¢ per cwt. at Fort Worth and 5-7¢ at Kansas City. Buyers who had been very active became more cautious as offerings increased and volume movement from the new crop grew closer.

Soybean prices slipped 2¢ per bushel. Weakness reflected to a large extent the poorer market for soybean oil and reports that the season's first new-crop soybeans have been combined near Terre Haute, Indiana. The crop is 5-10 days behind normal, but it made good growth in most areas with leaves turning yellow or starting to shed. Flaxseed dropped 5¢ at Minneapolis as marketings reached the heaviest volume so far this season.

UNITED STATES STANDARDS FOR MIXED GRAINS ... have been revised. The revision, to be effective December 1, 1960, provides that wild oats and certain mixtures of cultivated and wild oats would be defined as mixed feed oats. Mixed grain which meets the requirements of mixed feed oats would be graded No. 1 or No. 2 Mixed Feed Oats on the basis of certain quality factors. Quality factors that determine the grade of mixed feed oats will be the amount of foreign material, damaged kernels, and heat-damaged kernels which it contains, and the test weight per bushel.

STORAGE CAPACITY IN WAREHOUSES ... signed under the new Uniform Grain Storage Agreement as of August 15, 1960 for the storage of price-support commodities during the 1960-61 year totaled 4,201,414,000 bushels. This is slightly more than 99 percent of the capacity of 4,240,056,000 bushels included under the former Uniform Grain Storage Agreement as of June 29, 1960. The number of warehouses signed under the new agreement as of August 15, 1960 totaled 9,850 compared with 9,981 signed under the former agreement at the end of June. Warehousemen either declined to sign or failed to return new agreements covering 106 warehouses with a capacity of 31,148,000 bushels.

Soybeans: Inspected receipts, by grades and percent 1/

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for whear and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

4/ The monthly average price is the simple average of the daily closing prices.

COMMODITY CREDIT CORPORATION INVENTORY AND SALES

Average farm and parity prices from Crop Reporting Board.

Soybean prices compared with market value of soybean oil and soybean meal

Month	Soybean oil		Soybean meal		Value of oil and meal from bushel of soybeans 1/	Market price No. 1 Yellow soybeans Ill. pts.	Spread between soybean price and value of oil & meal
	Average price at crushing plant	Value from bu. of soybeans 1/	Bulk price at Decatur	Value from bu. of soybeans 1/			
	Cts. per pound	Dollars	Dollars per ton	Dollars	Dollars	Dollars per bu.	Cents
Aug. 1960	9.4	1.03	50.30	1.18	2.21	2.13	8
July 1960	8.9	0.98	50.75	1.19	2.17	2.09	8
June 1960	8.6	0.95	52.50	1.23	2.18	2.06	12
May 1960	8.2	0.90	54.20	1.27	2.17	2.09	8
Apr. 1960	7.9	0.87	56.50	1.33	2.20	2.11	9
Aug. 1959	9.3	1.02	54.25	1.27	2.29	2.00	29

1/ Based on assumption that a bushel of soybeans yields 11.0 pounds of oil and 47.0 pounds of meal.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil or soybean meal.

WEEKLY SUMMARY AND STATISTICS

GRAIN DIVISION AGRICULTURAL MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 8 No. 36 Washington 25, D. C. September 9, 1960

GRAIN MARKETS MIXED BUT LITTLE CHANGED

Cash grain markets showed a mixed trend during the holiday-interrupted week ended September 8. However, closing prices generally were little or no different from the previous week.

Winter wheat held firm behind good domestic and export demand for small offerings. Farmers continued to hold their wheat even though cash prices were favorable for selling. However, buyers were cautious, influenced by the possibility that current cash prices as related to loan rates may draw more wheat to market, the large size of the 1960 crop, and expectations that country and subterminal elevators may increase wheat shipments to make room for fall grains. Spring wheat prices softened and durum wheat lost 2-4¢ at Minneapolis as marketings were heavy and demand was not overly active. White wheat ruled firm at Portland where continued light country selling and active export trade bolstered the market. Rye, boosted by aggressive demand for light receipts, finished 1-3¢ higher at Minneapolis.

Corn turned weaker at most markets as heavier offerings faced slow demand and hot, dry weather in the Corn Belt favored the growing crop. However, Chicago with its grain handlers and railroad strikes posted a firm corn market as local demand was good for the small arrivals. Oats and barley markets were generally unchanged in quiet trading. Grain sorghum prices dropped 11-12¢ per cwt. at Kansas City and slipped 2¢ at Fort Worth. Demand slowed while receipts picked up as hot, dry weather speeded combining in active harvesting areas and benefitted the growing crop elsewhere.

Soybean markets were quiet. Day-to-day price fluctuations were tied closely to action of soybean meal and oil markets and to the influences of reports on the weather, harvesting progress, and the September crop estimate. Flaxseed lost 5¢ per bushel again this week at Minneapolis as marketings continued fairly heavy with harvesting hitting its full stride.

AMENDMENT TO FEDERAL SEED ACT ... rules and regulations, effective Nov. 1, 1960, brings rules for seed testing under the Act in line with rules adopted by the Association of Official Seed Analysts. Other amendments add upland cress to the list of seeds subject to the Act, change the definition of "hybrid," change the tolerances for piperonyl butoxide and pyrenthrins when used in treating seed, and add to the lists of recognized variety names of several kinds of seed.

PRICE-SUPPORT REQUIREMENTS FOR LIGHT-WEIGHT WHEAT ... will be relaxed because prolonged drought, particularly in North Dakota, is resulting in a higher percentage of light test wheat than usual. Lighter weight wheat included under the relaxed provisions will be "Sample" grade on test weight only, but no wheat testing less than 40 pounds per bushel will be eligible for support.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

4/ The monthly average price is the simple average of the daily closing prices.

WEEKLY SUMMARY AND STATISTICS

GRAIN DIVISION AGRICULTURAL MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 8 No. 37 Washington 25, D. C. September 16, 1960

MIXED TREND RULES GRAIN MARKET

Cash grain markets followed a mildly irregular trend during the week ended September 15. Spring and white wheat closed firm, winter wheat was generally unchanged, and most other grains weakened.

Steadiness of winter wheat was attributed mostly to the continued tight holding policy of producers, light offerings, and good domestic and export demand. Spring wheat went up 3¢ per bushel at Minneapolis as mills were good buyers while filling previous commitments. Durum wheat, however, softened under pressure from unloading congestion and lack of space. White wheat, supported by light offerings from the country and good demand from domestic mills as well as exporters, edged up 1-2¢ at Portland. Rye weakened in narrow trading at Minneapolis.

Corn prices firmed up behind good demand for light receipts at most markets but weakened at Chicago where buyers showed little interest beyond the immediate local industrial demand. The corn crop made good progress, but there was still some concern over the possibility of frost damage. Oats and barley markets were generally about unchanged with trading limited by light offerings. Grain sorghums held steady on lighter offerings at Fort Worth but lost 2-4¢ per cwt. as the flow of new-crop supplies increased considerably at Kansas City.

Soybeans closed 6¢ per bushel lower in strike-bound Chicago and 2¢ lower in Minneapolis. Buyers were not interested in old-crop beans and lowered their bids in reaction to reports of the spreading harvest. Flaxseed weakened at Minneapolis as buyers lowered bids in view of the forecast for a larger crop this year and weakness in linseed meal.

GRAIN INSPECTIONS DURING 1959-60 ... dropped slightly below the previous season due in part to the smaller 1959 small grain crops. Inspected receipts of grain in the fiscal year ending June 30 totaled 3.5 billion bushels as against nearly 4.0 billion in the previous season. With that exception it was the largest of record. Inspections were down from the previous year for each of the grains with the exception of soybeans and rye. The sharpest drop was in carlot inspections which were down 13 percent while cargo inspections were down 10 percent. Inspected trucklot receipts increased 16 percent with the biggest share in wheat, oats, grain sorghums and soybeans. Inspections of trucklot shipments were down slightly with most of the loss in corn. Barge receipts of 361 million bushels were inspected last season. Most of the grain moved down the Mississippi River with 96 million inspected at New Orleans and 60 million at Port Allen. Nearly 35 million bushels moved up the Tennessee River to Chattanooga and Guntersville. Barge shipments at river points of around 190 million were inspected last season. Of this, 50 million moved from Minneapolis, 38 million from St. Louis, and 24 million from Peoria. Other points at which over 5 million or more bushels were inspected cargo shipments were Keokuk, Kankakee, Kansas City, Evansville, Henderson, Memphis, Omaha, Springfield and Cairo, Illinois.

NOTE: For more details on inspections see pages 9-16.

CANADIAN GRAIN SUPPLIES ... for 1960-61 are generally slightly above the previous season, reflecting the better 1960 crop prospects. Wheat supplies of over one billion are in prospect this season on the basis of current estimates of production. While this is 46 million more than last season, it is smaller than the four previous seasons. An increase of nearly 50 million in production was forecast on the basis of August 15 conditions. Oats and barley supplies are down slightly from last season, due in part to smaller carryover stocks. The oats crop is up almost enough to overcome the drop in carryover but the barley crop and carryover are both below last year. Rye supplies, while slightly above last season, are well below average. A 48 percent increase in the flaxseed crop forecast, if realized, would boost supplies to the largest since 1956-57.

Feed grain payment-in-kind export bids, September 9-15, 1960

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

4/ The monthly average price is the simple average of the daily closing prices.

COMMODITY CREDIT CORPORATION INVENTORY AND SALES

GRAIN MARKETS SHOW MIXED TREND

Cash grain markets continued to show a mixed trend during the week ended September 22. Wheat and barley generally looked firm at the close, but other grains ruled weak to mostly lower. Trading was slowed to some extent by continued light marketing of most grains in the country.

Firmness in winter wheat reflected slow selling by farmers and good domestic and export demand. Offerings were light but about matched trade needs. The amount of wheat under price support August 31 totaled 252.4 million bushels as against 174.2 million a year earlier. This also had a strengthening effect. Spring and durum wheat went up about 2¢ per bushel on smaller receipts at Minneapolis. Strength came in the face of continued slow flour business. White wheat was generally unchanged at Portland where the market drew support from light country selling and good export interest. Rye prices slipped 2-3¢ at Minneapolis.

Corn prices dropped 4-7¢ per bushel at principal markets under pressure from nearness of the new crop. Traders indicated little concern that any heat damage to the maturing crop will have much effect on the new-crop supply. Settlement of the elevator strike by two unions in Chicago also had a weakening influence on the market. Oats were a little weaker largely in sympathy with corn, while barley held firm on relatively light receipts.

Grain sorghums declined 2¢ per cwt. at Fort Worth reflecting the expanded harvest in Texas where over half the crop is harvested and demand was inactive. However, prices gained 2¢ at Kansas City influenced by an active demand.

Soybeans remained unchanged to 2¢ lower as the harvest expanded in the southern producing areas. Crushers were having no difficulty in obtaining supplies at current price levels although the northern producing areas remained in danger of a killing frost. Flaxseed dropped 8¢ per bushel at Minneapolis as liberal offerings met a limited demand.

Wheat - distribution by protein brackets of Hard Red Spring wheat tested at Minneapolis	2
Feed grains - payment-in-kind export bids	2
Wheat - amount under price support by States	7
Grains - amount under price support	8

PRICE-SUPPORT ACTIVITY ... through August 31 showed that farmers had put 252.4 million bushels of 1960-crop wheat under loans and purchase agreements. This compares with 174.2 million bushels of 1959-crop wheat under price support the same date a year earlier. Nearly 45 percent of the wheat under support was in Kansas, but substantial amounts also were under loan in Nebraska, Oklahoma and Texas. Noteworthy amounts of other grains under price support August 31, with figures for a year earlier in parentheses, in million bushels, were: Barley 9.6 (7.4); oats 2.1 (2.2); and grain sorghums 3.7 (5.7). Farmers also had put 529.5 million bushels of 1959-crop corn under price support as of August 31. Of this amount, they had repaid loans on 58.2 million bushels and had delivered 64.4 million bushels to CCC.

P. L. 480 AGREEMENT WITH U.A.R. (SYRIA) ... dated August 9, 1960 was amended this week. Amendment provides for sale of $1.6 million worth (including certain ocean transportation costs) or about 1,150,000 bushels of barley for Syrian pounds. The barley will be made available under the U. S. Food for Peace program. Sales will be made by U. S. private traders. Purchase authorizations will be announced later.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

4/ The monthly average price is the simple average of the daily closing prices.

olume 8 No. 39 Washington 25, D. C. September 30, 1960

GRAIN MARKETS RULE FIRM

Most cash grain markets closed on a firm note, but soybean prices softened during the week ended September 29.

Winter wheat finished unchanged to 3¢ per bushel higher. Sales by farmer and interior elevators continued to lag and terminal market offerings failed to satisfy good domestic and export demand. Spring wheat was generally unchanged but durum wheat advanced 5¢ at Minneapolis. Slow flour sales to bakers dulled trading in spring wheat, while durum trade was bolstered by lighter receipts and improvement in semolina shipping directions. White wheat slipped 2¢ at Portland as buyers became cautious when reports of increased country selling reached the market. Anticipation of lower freight rates also influenced the cautious attitude among buyers. Rye went up 3-5¢ at Minneapolis with very little activity on light receipts.

Corn prices strengthened with good demand for limited receipts at some markets but weakened behind narrow demand at others. The crop seems to have developed well and picking started in scattered areas. Each passing day lessens the danger of frost damage. This also is a weakening influence. Oats held steady with good export demand and light receipts. Barley prices firmed up on limited offerings. Grain sorghums held firm behind good demand at Kansas City but weakened at Fort Worth as the market lacked active buyers with harvesting expanded to the South and Central Plains.

Soybean prices continued downward under pressure from spreading harvest of new-crop beans. Markets were off 1¢ per bushel at Minneapolis, 2-3¢ at Chicago, and 3-4¢ at Illinois country points. However, weakness was cushioned to some extent by continued good exports and the heavy rate of crush. Flaxseed was unchanged at Minneapolis, with offerings limited.

P. L. 480 AGREEMENTS ... with India and Iran supplemented by additional financing according to recent announcements. The supplemental agreement with India provides for the financing of $17.1 million worth, including certain ocean transportation costs, of agricultural commodities for rupees (Indian currency) under Title I of Public Law 480. The commodities include $6.8 million of corn (around 5.3 million bushels), $4.3 million of grain sorghums (approximately 3.9 million bushels), $2.0 million of tobacco, $1.0 million soybean oil and $3.0 million for ocean transportation. The supplemental agreement with Iran finances the sale of $15,128,000 or about 7.3 million bushels of wheat or wheat flour for rials (Iranian currency) under the same law. Both of these agreements are part of the U. S. Food for Peace program. Sales will be made by private traders.

P. L. 480 AUTHORIZATIONS ... were issued to Poland, Korea and U.A.R. Egypt and Syria during the past week. Authorization No. 41-43 to Poland now provides for the purchase of an additional 56,000 metric tons of grain sorghums, bringing the total authorization to 106,000 metric tons. Authorization No. 24-35 to Korea provides for the purchase of 24,000 metric tons of white wheat. Authorization No. 48-09 to U.A.R. Syria provides for the purchase of about 25,000 metric tons of barley while Authorization No. 46-25 to U.A.R. Egypt provides for an additional purchase of about 70,000 metric tons of wheat flour from U. S. suppliers.

SOYBEAN MARGINS... were small last season reflecting the generally low prices for oil. Soybean oil, which advanced in August and September, averaged 8.3¢ per pound last season, the lowest in many years. These prices compare with 9.5¢ in 1958-59 and 10.8¢ in 1957-58. Soybean meal prices last season averaged about the same as the year before and a little better than the two previous seasons. No. 1 soybeans at Illinois points averaged $2.08 per bushel last season compared with $2.11 for 1958-59 and $2.19 for 1957-58. The spread between the soybean price and the value of the oil and meal was 13¢ last season as against 24¢ the year before and 26¢ for 1957-58.

Feed grain payment-in-kind export bids, September 23-29, 1960

Grain	Sept.-Oct. Export period		Nov.-Dec. Export period		Jan.-Feb. Export period		Total	Cumulative total 1/

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

4/ The monthly average price is the simple average of the daily closing prices.

COMMODITY CREDIT CORPORATION INVENTORY AND SALES
(All data in 1,000 bushels except grain sorghums in 1,000 cwt.)

Grain Market News

WEEKLY SUMMARY AND STATISTICS

GRAIN DIVISION AGRICULTURAL MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 8 No. 40 Washington 25, D. C. October 7, 1960

GRAIN MARKETS LITTLE CHANGED

Cash grain markets fluctuated within a narrow range and generally showed little or no change for the week ended October 6.

Winter wheat closed on a firm note. Farmers continued a tight holding policy, but offerings at terminals picked up as country elevators moved wheat out to make room for incoming fall grains. Current supplies were readily absorbed by active milling and export demand. Spring and durum wheat finished a little weaker at Minneapolis with demand slower for heavier offerings. White wheat ruled firm at Portland. Domestic and export demand was good, particularly for the lower proteins. Rye held firm at Minneapolis.

Corn weakened slightly, largely under pressure from nearness of large-scale harvesting in major producing areas. Current offerings were well and quickly taken as a rule. Oats and barley markets were generally unchanged in quiet trading, but oats lost 2-3¢ per bushel and malting barley advanced 2-4¢ behind good demand at Minneapolis. Grain sorghums lost 3-4¢ at Kansas City and went down a penny at Ft. Worth as receipts of new-crop grain swelled and demand was tempered by the increasing tightness of storage space.

Soybeans closed about unchanged. Harvesting made good progress, with plentiful supplies of new soybeans being offered. Processors found little reason to pay much over local loan values despite improved markets for end products. Flaxseed went down 3¢ per bushel at Minneapolis.

P. L. 480 PURCHASE AUTHORIZATION ... issued to the United Arab Republic (Egypt) has been amended to provide for purchase of an additional $8,377,600 worth (about 150,000 metric tons) of wheat from U. S. suppliers. The increase represents a further programming of funds under an agreement announced August 1, 1960. Authorization No. 46-26, as amended, provides for purchase of a total of about 250,000 metric tons of wheat, Grade U. S. No. 2 or better, in bulk. Only the following wheat will be eligible for financing: (1) soft red winter wheat of the subclasses red winter and western red, and (2) mixed wheat containing the classes of soft red winter wheat, hard red spring wheat, or hard red winter wheat.

CORN, GRAIN SORGHUM AND SOYBEAN PRICES ... for the 1959-60 season averaged lower at principal markets, reflecting lower 1959-crop price support rates. Corn was down 2-7¢ per bushel from the 1958-59 season; grain sorghums, 25-28¢ per cwt.; and soybeans, 3-5¢ per bushel. For the year beginning October 1959 and ending September 1960, No. 2 yellow corn averaged $1.15 per bushel at Kansas City, $1.10 at Omaha, $1.18 at Chicago, $1.13 at Toledo, $1.19 at St. Louis, and $1.07 at Minneapolis. The season's average price of No. 2 yellow milo stood at $1.69 per cwt. in Kansas City, $1.98 in Ft. Worth, $2.24 in San Francisco, and $2.22 in Los Angeles. No. 1 yellow soybeans averaged $2.17 per bushel at Chicago, $2.11 at Toledo, $2.04 at Minneapolis, and $2.08 at Illinois country points. Corn prices reached the season's peak in May and June at most markets, while monthly average prices of grain sorghums hit their peak a little earlier --during April. Soybeans enjoyed better supply and conditions than either corn or grain sorghums and prices fluctuated within a relatively narrow range during the 1959-60 season. Prices were lowest at the beginning of the crop year, during October, and reached the high point the following month. They seesawed back and forth during the next eight months, and in August again stood at or near the season's high. Even though prices started down on an adjustment to a new-crop basis in September, soybeans still sold generally above the season's low point.

Feed grain payment-in-kind export bids, September 30-October 6, 1960

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

4/ The monthly average price is the simple average of the daily closing prices.

WEEKLY SUMMARY AND STATISTICS

GRAIN DIVISION AGRICULTURAL MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 8 No. 41 Washington 25, D. C. October 14, 1960

GRAIN MARKETS UNSETTLED

Cash grain markets continued to fluctuate within a narrow range and prices registered little or no change for the week ended October 13.

Winter wheat closed on the weak side again. Softness was attributed largely to heavier offerings from interior elevators where the influx of fall grains started crowding storage facilities. Farmers generally maintained a tight holding policy but there was a slight pickup in farm selling in some areas. Domestic and export demand remained good and readily absorbed terminal market offerings. Planting of winter wheat made good progress in most areas, but dry soil slowed seeding in some sections. Spring and durum wheat finished about unchanged at Minneapolis where buying was hampered by the scarcity of storage space locally as well as at the head of the lakes. White wheat gained 2¢ at Portland with strength stemming from active export trade and a 2¢ increase in the export subsidy rate. Rye weakened at Minneapolis where receipts increased and rye flour trade was slow.

Cash corn markets were mixed but gains and losses were limited to not more than 1 or 2¢ per bushel either way. Strength at Chicago and Omaha was largely due to light offerings, while weakness at other markets reflected the increasing harvest rate and heavier offerings. Oats and barley markets were generally unchanged as relatively light offerings continued to limit trading. Grain sorghum prices held steady with current offerings about matching demand.

Soybeans held firm. Although marketings picked up as harvesting gained momentum, encouragement came from a well maintained rate of exports and a slight reduction in the October 1 crop estimate. Flaxseed weakened in Minneapolis.

Soybeans - inspections for export by ports and country of destination, 1959-60	11
Grains - barge inspected receipts and shipments by midwest river markets, September 1959 and 1960	12

BARGE INSPECTED RECEIPTS AND SHIPMENTS ... at midwest river markets during September were sharply above a year earlier. Shipments of wheat, corn, oats, barley, grain sorghums, and soybeans totaled almost 19.4 million bushels. This was about 31 percent above September 1959 shipments. Receipts of these same grains at the southern end of the rivers reached nearly 15.2 million bushels, or 47 percent more than the same month a year ago. Barge movement of wheat showed the most change. Shipments of around 7 million bushels were up 2.4 million bushels, while receipts of 9.4 million were almost 4.1 million bushels heavier than a year earlier. September oats shipments also showed a notable increase -- about 1.3 million bushels more than the year before. Corn was the only grain to show a decrease in receipts. They were down 281,000 bushels from the previous September. (See details on last page.)

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

4/ The monthly average price is the simple average of the daily closing prices.

1/ Includes 77,000 bushels shipped from Pacific Ports. 2/ Includes 140,000 bushels shipped from Pacific Ports. 3/ Of the total corn inspected for export October 1959 through September 1960, 9,095 bushels were White corn of which 99.6 percent was exported through the Gulf Ports. Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

1/ 90,000 bushels reported from Corpus Christi to Belgium.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases the ultimate destination of the soybeans exported is not shown on the inspection reports, therefore, the quantity of each country may vary from official Census data, which are based on custom declarations.

Grain Market News

WEEKLY SUMMARY AND STATISTICS

GRAIN DIVISION AGRICULTURAL MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 8 No. 42 Washington 25, D. C. October 21, 1960

GRAIN MARKETS MIXED

Cash grain markets showed a mixed price trend during the week ended October 20. Soybeans and grain sorghums strengthened while flaxseed weakened. Other grains were little or no different from a week ago.

Winter wheat closed on a firm note. Selling in the country remained at a low ebb and offerings at terminal markets found ready outlets in both milling and export channels. Planting made good progress and some fields were up to good stands. Spring and durum wheat were generally unchanged in narrow trading at Minneapolis. Flour business was quiet but the market drew some support from export news. White wheat strengthened at Portland, bolstered mainly by active export trade. Rye weakened at Minneapolis, influenced mostly by this year's larger crop and lighter exports.

Corn markets remained mixed with gains and losses generally limited to 1 or 2¢ per bushel. Changes were attributed largely to wet weather which interrupted harvesting in some areas and to colder weather which helped maturity and drying of the crop in other areas. Oats and barley ruled about unchanged in light trading at most markets. Grain sorghums firmed up as demand remained fairly good and offerings slacked off when rains and cooler weather delayed or slowed harvesting.

Soybeans climbed 2-3¢ per bushel higher this week, supported largely by trade opinion that the harvesting peak had passed. Flaxseed lost 5¢ at Minneapolis, reflecting for the most part weakness in the oil market.

Special Features

	Page
Feed grains - payment-in-kind export bids	2
Wheat - supplies in four exporting countries	7
Grains - CCC-owned stocks by States	8-9
Wheat - CCC-owned stocks by classes	10
Soybeans - inspected receipts by grades	10
Wheat - amount under price support by States	11
Grains - amount under price support	12

PRICE-SUPPORT ACTIVITY ... through September 30 showed that farmers had put 324.2 million bushels of 1960-crop wheat under loans and purchase agreements. This compared with 234.7 million bushels of 1959-crop wheat put under support as of the same date a year ago. Of the 324.2 million bushels of 1960-crop wheat under support, 262.1 million bushels were warehouse-stored and 61.7 million bushel farm-stored loans, and about 494,000 bushels were under purchase agreements. Noteworthy amounts of other grains under support as of September 30 in million bushels, with comparable figures for a year ago in parentheses, were: barley 20.4 (17.1); oats 7.3 (4.5); and grain sorghums 4.6 (6.6). Most of the barley under support was in California, Minnesota, Montana, North Dakota, Oregon, South Dakota, and Washington. Texas accounted for the bulk of grain sorghums under support. Of the 529.5 million bushels of 1959-crop corn that farmers put under price support, 64.6 million bushels had been repaid through September, 159.1 million had been delivered to CCC, and 42.5 million bushels had been resealed for another year.

P. L. 480 WHEAT PURCHASE AUTHORIZATION ... issued to U.A.R. (Egypt) has been amended to provide for the purchase of wheat flour, as well as wheat, from U. S. suppliers under Title I. Authorization provides for the purchase of about 100,000 metric tons of wheat in bulk or wheat flour in bags. Only the following wheat will be eligible for financing: (1) hard red spring of the subclasses dark northern spring, northern spring, and red spring; (2) hard red winter of the subclasses dark hard winter, hard winter, and yellow hard winter; and (3) mixed wheat containing not more than 5 percent of the classes of wheat (excluding durum) other than the classes specified in (1) and (2). Flour milled from durum wheat of the subclasses hard amber durum, amber durum, and durum, and from red durum wheat will not be eligible for financing.

P. L. 480 WHEAT FLOUR PURCHASE AUTHORIZATION ... was issued to Ceylon to finance the purchase of $4.1 million worth of wheat flour from U. S. suppliers under Title I. Authorization provides for the purchase of approximately 54,000 metric tons of wheat flour in bags. Flour milled from the following wheat will not be eligible for financing: (1) durum wheat of the subclasses hard amber durum, amber durum, and (2) red durum.

Feed grain payment-in-kind export bids, October 14-20, 1960

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

4/ The monthly average price is the simple average of the daily closing prices.

Volume 8 No. 43 Washington 25, D. C. October 28, 1960

GRAIN MARKETS REMAIN MIXED

Cash grain markets continued to show a mixed trend during the week ended October 27. Except for corn, which dropped, gains and losses were relatively small.

Winter wheat prices softened at Kansas City, held steady at Fort Worth but strengthened at Chicago. Offerings were light. Selling by farmers remained slow, and elevator offerings dropped off as reduced marketings of fall grains eased pressure for storage space. Demand was not as active as in recent weeks. Spring and durum wheat ruled firm on lighter receipts at Minneapolis. Millers were grinding at peak levels, reflecting better flour sales, and offered good demand for spring wheat. White wheat, influenced by good export buying interest, dependable domestic demand and slow producer marketings, edged up 2¢ per bushel at Portland. Rye was under pressure from the largest October 1 stocks since 1955 and slipped 2¢ at Minneapolis.

Corn prices dropped 2-6¢ per bushel at principal markets. Increased movement of new-crop corn to market and the record October 1 carry-over stocks exerted pressure on cash prices. With a heavy freeze and drying weather in the Corn Belt, picking got well underway and moisture content rapidly neared a safe storage level. However, buyers were strict in applying moisture discounts. Oats markets were on the soft side and barley ruled firm. Offerings were light but about adequate for day-to-day demand. Grain sorghum markets looked firm. Receipts were about in line with fairly good domestic and export demand.

Soybean markets were mixed -- down 3¢ per bushel in Chicago but up 2¢ in Minneapolis. Storage space was the weakening factor at Chicago, as marketings continued heavy even though the peak of harvesting has passed. Smaller October 1 stocks and stronger meal and oil prices supported the Minneapolis market. Flaxseed remained unchanged in slow trading at Minneapolis.

P. L. 480 GRAIN SORGHUM PURCHASE AUTHORIZATION ... issued to Israel has been amended to finance the purchase of an additional $798,388 worth (about 18,900 metric tons) of grain sorghums from U. S. suppliers under Title I. The increase represents reprogramming of unused funds from authorizations previously issued to Israel. Authorization 16-73, as amended, provides for the purchase of about 68,900 metric tons of grain sorghums in bulk, Grade U.S. No. 2 or better. Purchase of 46,000 tons previously authorized has been completed.

Soybean prices compared with market value of soybean oil and soybean meal

Month	Soybean oil: Average price at crushing plant	Soybean oil: Value from bu. of soybeans 1/	Soybean meal: Bulk price at Decatur	Soybean meal: Value from bu. of soybeans 1/	Value of oil and meal from bushel of soybeans 1/	Market price No. 1 Yellow soybeans Ill. pts.	Spread between soybean price and value of oil & meal
	Cts. per pound	Dollars	Dollars per ton	Dollars	Dollars	Dollars per bu.	Cents
Oct. 1960	9.3	1.02	48.95	1.15	2.17	2.04	13
Sept.1960	9.0	0.99	53.75	1.26	2.25	2.07	18
Aug. 1960	9.4	1.03	50.30	1.18	2.21	2.13	8
July 1960	8.9	0.98	50.75	1.19	2.17	2.09	8
June 1960	8.6	0.95	52.50	1.23	2.18	2.06	12
Oct. 1959	8.6	0.95	56.60	1.33	2.28	2.01	27

1/ Based on assumption that a bushel of soybeans yields 11.0 pounds of oil and 47.0 pounds of meal.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil or soybean meal.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

4/ The monthly average price is the simple average of the daily closing prices.

Volume 8 No. 44 Washington 25, D. C. November 4, 1960

CORN DOWN - MOST OTHER GRAINS STRONG

Corn prices continued downward under pressure of heavy harvest movement during the week ended November 3. Most other cash grain markets strengthened.

Winter wheat advanced 2-4¢ per bushel behind good mill and export demand for light offerings. Country selling remained slow and the generally favorable relationship of cash prices to effective support failed to draw any substantial amount of wheat from under price support. Elevator offerings also slacked off as the pressure to make storage space for fall grains subsided. Spring and durum wheat held steady at Minneapolis. Receipts were lighter but mills were able to buy enough wheat to replace their daily grind. White wheat was 2¢ higher at Portland, influenced by the tight holding tendency of farmers and good export interest. Rye went up 3¢ on sharply reduced receipts at Minneapolis.

Cash corn prices closed unchanged to 4¢ per bushel lower at principal markets. Harvesting made good progress and offerings increased. However, demand was on the slow side. Moisture content remained an important buying factor. Oats and barley ruled firm with trading limited by light offerings. Grain sorghums looked strong with good domestic and export demand.

Soybeans advanced 4-5¢ per bushel, reflecting the rapid reaction to the drop in receipts as harvesting passed its peak. Producers were holding more firmly and lighter offerings found active competition between crushers and exporters. Flaxseed was an exception along with corn to the upward trend and finished 3¢ lower at Minneapolis. Weakness was attributed mostly to lower Minneapolis and Canadian futures markets.

TWO P. L. 480 WHEAT PURCHASE AUTHORIZATIONS TO POLAND ... were amended this week to provide for the purchase of an additional $24,104,000 worth (about 400,000 metric tons) of wheat from U. S. suppliers. Authorizations, as amended, provide for purchase by Poland of a total of about 1 million metric tons of wheat. Amended Authorization 41-40 provides for purchase of about 500,000 metric tons of wheat in bulk, Grade U. S. No. 2 or better. Only the following wheat will be eligible for financing under this authorization: (1) hard red spring of the subclasses dark northern spring, northern spring, and red spring; (2) hard red winter of the subclasses dark hard winter, hard winter, and yellow hard winter; and (3) mixed wheat containing not more than 5 percent of the classes of wheat (excluding durum) other than the classes specified in (1) and (2). Purchase of 250,000 metric tons of the quantity previously authorized has been completed. Amended Authorization 41-39 provides for the purchase of about 500,000 metric tons of wheat in bulk, Grade U.S. No. 2 or better. Only the following wheat will be eligible for financing: (1) soft red winter of the subclasses red winter and western red, and (2) mixed wheat containing the classes of soft red winter wheat, hard or red spring, or hard red winter. Purchase of 260,000 metric tons of the quantity previously authorized has been completed.

P. L. 480 BARLEY PURCHASE AUTHORIZATION TO POLAND ... also was amended this week to provide for the purchase of an additional $2,473,000 worth (about 48,000 metric tons) of barley from U. S. suppliers under Title I. As amended, Authorization 41-41 provides for the purchase of a total of about 223,000 metric tons of barley in bulk, Grade U. S. No. 3 or better, of the classes barley or western barley, excluding malting barley of any type. Purchases of the quantity previously authorized have been completed.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

4/ The monthly average price is the simple average of the daily closing prices.

1/ July 1, 1960-October 28, 1960 for wheat, rye, oats, barley and flaxseed; October 1, 1960-October 28, 1960 for corn, grain sorghums and soybeans.

2/ For unrestricted domestic use except soybeans and flaxseed which are sold for domestic or export use at announced prices.

3/ Sales under Payment-in-kind Program; not applicable to soybeans and flaxseed.

* Does not include 65,167 bushels of corn, 22,484 bushels of oats, 17,535 bushels of barley and 16,869 cwt. of grain sorghums sold under Livestock Feed Program.

Grain Market News

WEEKLY SUMMARY AND STATISTICS

GRAIN DIVISION AGRICULTURAL MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 8 No. 45 Washington 25, D. C. November 10, 1960

CORN AND SOYBEANS WEAKEN

Corn and soybean prices weakened but other cash grain markets showed little or no change during the election-shortened week ended November 9.

Winter wheat ruled firm, bolstered by continued light offerings and good domestic and export demand. Some farmers showed more selling interest and offerings from interior elevators picked up slightly. However, demand could have absorbed still larger supplies as forward booking of domestic flour was heavy. Spring wheat was supported by mill demand to cover bakery flour orders and held steady but durum wheat found draggy demand and dropped 4-6¢ per bushel at Minneapolis. White wheat remained steady at Portland. Trading was spotty -- good one day but slow the next. Exporters provided the principal outlets and quickly picked up daily offerings of wheat. Rye was firm at Minneapolis, influenced by stronger subsidy rates under the Payment-in-kind Export Program.

Corn finished unchanged to 3¢ per bushel lower with the market still under harvest pressure. Harvesting pushed forward throughout the Corn Belt, but progress was slowed to some extent by the high moisture content of the crop. Oats weakened, influenced mostly by the downturn in corn. Barley was generally unchanged but malting type lost 2¢ at Minneapolis where maltsters failed to support the market. Grain sorghums weakened as harvesting gained momentum and offerings proved excessive for demand.

Soybean prices went down 3¢ per bushel, reflecting for the most part weakness in meal and oil markets. Processor demand was not very aggressive. Trade rumors of production cutbacks also had a weakening influence on the spot market. Flaxseed remained unchanged in quiet trading at Minneapolis.

P. L. 480 WHEAT PURCHASE AUTHORIZATIONS ISSUED TO TURKEY ... last week will finance the purchase of $7,040,877 worth (about 120,000 metric tons) of wheat from U. S. suppliers under Title I. Authorization No. 10-46 provides for purchase of about 60,000 metric tons of wheat, Grade U. S. No. 2 or better, in bulk or bags; Authorization No. 10-47, for purchase of about 60,000 metric tons of wheat, Grade U. S. No. 2 or better, in bulk.

P. L. 480 AGREEMENT WITH GREECE ... and issuance of four grain purchase authorizations under the agreement were announced this week. Agreement with Greece was negotiated under Title I for purchase by that country of $13.7 million worth (including certain ocean transportation costs) of U. S. surplus agricultural commodities. Included in the agreement are about 1.5 million bushels of wheat and/or wheat flour and 3.9 million bushels of feed grains. Authorization No. 26-44 provides for purchase of about 40,000 metric tons of wheat, Grade U. S. No. 2 or better, in bulk; Authorization No. 26-45, for purchase of about 5,000 metric tons of grain sorghums in bulk, Grade U. S. No. 2 or better; Authorization No. 26-46, for purchase of about 76,000 metric tons of yellow corn, in bulk, Grade U. S. No. 2 or better; and Authorization No. 26-47, for purchase of about 26,000 metric tons of barley in bulk, Grade U. S. No. 3 or better.

P. L. 480 FLOUR PURCHASE AUTHORIZATION TO VIET NAM ... was issued this week to finance the purchase of $3,528,000 worth of wheat flour. Authorization No. 45-06 provides for the purchase of about 40,000 metric tons of flour in bags. Flour milled from durum wheat of the subclasses hard amber durum, amber durum and durum, and from red durum wheat will not be eligible for financing.

P. L. 480 AGREEMENT WITH CHILE ... providing for the sale of $28.9 million worth (including certain ocean transportation costs) of U. S. agricultural commodities under Title I was announced this week. Included in the agreement are approximately 9.2 million bushels of wheat and about 1 million bushels of feed grains. Sales will be made by private U. S. traders.

SUBSIDY RATES FOR HARD WINTER WHEAT EXPORTS ... from West Coast ports will be the same as the rate for exports from the Gulf and East Coasts, Great Lakes and St. Lawrence River effective November 10, 1960. A separate rate will be continued for West Coast exports of other classes, including white wheat.

Feed grain payment-in-kind export bids, November 4 - 9, 1960

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

4/ The monthly average price is the simple average of the daily closing prices.

WEEKLY SUMMARY AND STATISTICS

GRAIN DIVISION AGRICULTURAL MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 8 No. 46 Washington 25, D. C. November 18, 1960

GRAIN MARKETS WEAKEN

Cash grain markets, paced by a sharp drop in corn prices, generally turned downward during the week ended November 17.

Wheat markets softened despite the continued tight holding policy of farmers and very active domestic and export demand. Weakness in winter wheat was stemmed to some extent, however, by growing concern over the amount of wheat going into loan and the possibility of a shortage of "free" supplies later in the season. Weakness in spring wheat was attributed to slower demand as the end of water shipping drew near. Lack of storage space was also mentioned by some traders. White wheat held firm at Portland. Export interest held up and farmers sold a little more wheat as cash prices continued favorable in relation to effective support rates. Rye also held firm at Minneapolis.

Corn prices dropped 3-7¢ per bushel and closed at the lowest levels in 18 years. Harvesting of the record crop neared the three-quarter mark and offerings increased. Demand was good but high moisture content of the crop narrowed outlets and taxed drying facilities. Oats, influenced mostly by the drop in corn, went down 2-4¢ despite relatively light receipts and fairly good demand. Barley was generally unchanged at most markets, but feed type lost 5-8¢ behind poor demand at Minneapolis. Grain sorghums dropped 5¢ per cwt. at Kansas City and slipped 1¢ at Fort Worth under harvest pressure of the record crop and a tightening of storage space. More sorghums were reported moving into loan in the Southwest.

Soybeans finished 2-3¢ per bushel lower. Softness in soybean oil and meal markets, weakness in other grains, and lower futures markets were behind the downturn for soybeans. Flaxseed went down 2¢ at Minneapolis.

Special Features

	Page
Corn, grain sorghums and soybeans - harvested acreage, yield and production	2
Feed grains - payment-in-kind export bids	2
Corn, grain sorghums and soybeans - U. S. exports by country of destination, October-September 1958-59 and 1959-60	7
Grains - barge inspected receipts and shipments by midwest river markets, October 1959 and 1960	8

CROP PROSPECTS ... based on November 1 conditions indicate record 1960 corn and grain sorghum crops and the second largest soybean crop of record. Corn production is expected to reach nearly 4.4 billion bushels -- 3 percent above the October 1 forecast, slightly above 1959, and 34 percent above average. Indicated production of 618 million bushels of grain sorghums is 7 percent more than in 1959 and 1 percent above the 1958 previous record. Soybean production, estimated at 560 million bushels, is 4 percent above the 1959 crop and second only to the record 580 million bushels produced in 1958.

P. L. 480 CORN PURCHASE AUTHORIZATION ISSUED TO URUGUAY ... this week provides for the purchase of about 57,000 metric tons of yellow corn in bulk, Grade U. S. No. 2 or better from U. S. suppliers under Title I.

P. L. 480 WHEAT PURCHASE AUTHORIZATIONS ISSUED TO CHILE ... this week provide for the purchase of about 40,000 metric tons of wheat, Grade U. S. No. 2 or better, in bulk or bags, from U. S. suppliers under Title I.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

4/ The monthly average price is the simple average of the daily closing prices.

Grain Market News

WEEKLY SUMMARY AND STATISTICS

GRAIN DIVISION AGRICULTURAL MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 8 No. 47 Washington 25, D. C. November 25, 1960

GRAIN MARKETS GENERALLY IMPROVED

Cash grain markets generally improved during the shortened week ending November 23. Wheat markets strengthened with improved demand while corn firmed up at most markets following the sharp drop of earlier weeks. Other grains traded within a narrow range at about unchanged prices.

Winter wheat gained 1-5¢ with an improved demand for light offerings. Farm selling continued slow. Spring wheat finished unchanged to 1¢ higher with demand stemming mainly from the mild weather which allowed extension of the navigation season and shippers in Duluth needing additional lots to top out vessels. Durum wheat offerings were light and the market more firm. Trading in White wheat in the Pacific Northwest was moderately slow with a fair demand for limited offerings. Rye dropped 2¢ per bushel with increased receipts and slow flour business.

Corn markets leveled off after the sharp declines of the past few weeks. Smaller receipts, improved demand and more elevator space were strengthening factors. Prices were mostly unchanged to as much as 3¢ per bushel higher than a week ago. Oats improved along with corn with good demand for light offerings. Barley was mostly unchanged to lower with demand limited to the better malting grades. Feed barley closed about unchanged. Grain sorghums were about unchanged at Fort Worth but closed 3-4¢ lower at Kansas City with some offerings containing too high moisture content to go into loan or storage.

Soybean markets strengthened, bolstered by light receipts and good export demand for soybeans and an active inquiry for soybean oil. Prices gained 1¢ during the week. Soybean crushings of 35.6 million bushels during October were only slightly above a year ago. However, inspections for export October 1 through November 18 totaled nearly 29 million bushels as against 22 million for the same period last year. Flaxseed was steady in light trading with limited demand and small offerings.

Special Features

	Page
Grains - U. S. imports, September	2
Feed grains - payment-in-kind export bids	2
Soybeans - inspected receipts by grades	7
Soybeans and Flaxseed - supply and distribution, monthly	7
Wheat, rye, corn, oats, barley, grain sorghums, soybeans and flaxseed - amount under price support by states	8-11
Grains - amount under price support	12

FREE STOCKS OF WHEAT ... totaled a little over 700 million bushels at the first of November compared with 588 million a year earlier. CCC owned 1,118 million bushels on November 1 or about the same as a year earlier. Nearly 333 million bushels remained under support with an additional 60 million under reseal as against 255 million under support a year ago and 55 million under under reseal. Supplies available for export, milling and carryover totaled 2,217 million this November 1 as against 2,012 million a year earlier.

Grains - United States imports, September 1960

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

4/ The monthly average price is the simple average of the daily closing prices.

Grain Market News

WEEKLY SUMMARY AND STATISTICS

GRAIN DIVISION AGRICULTURAL MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 8 No. 48 Washington 25, D. C. December 2, 1960

MOST GRAIN MARKETS IMPROVE

Cash grain markets became more irregular but most prices showed further improvement during the week ended December 1. Corn, grain sorghums, soybean and flaxseed markets turned upward, and spring wheat was firm. Other grains closed about unchanged except for rye which was weaker. Trading slowed with the approach of the Christmas and New Year holiday season.

Winter wheat held its own, helped by the continued tight holding policy of farmers and fairly active domestic and export demand for current offerings. Spring wheat finished 2¢ higher and durum was about unchanged at Minneapolis. Receipts were lighter but demand was not urgent. White wheat, influenced by limited country selling, diminishing "free" stocks and improved export inquiry, held firm at Portland. Rye lost 3¢ per bushel at Minneapolis.

Corn markets continued their upward trend, closing unchanged to 6¢ per bushel higher. The market was under less pressure as harvesting neared completion. Demand was good at current low prices, but buying was tempered by overtaxed drying and storage facilities. Oats and barley were generally unchanged to slightly weaker with demand on the quiet side. Grain sorghum prices firmed up by about 2¢ per cwt. Demand was good as buyers were anxious to pick up sorghums at current low prices. Trading was limited, however, by relatively light offerings.

Soybeans went up 2-4¢ per bushel as offerings remained small. Selling by farmers was limited. Demand was good, reflecting continued heavy exports of soybeans, good business in oil, and some firmness in the soybean meal market. Flaxseed advanced 6¢ on lighter offerings at Minneapolis.

Soybean prices compared with market value of soybean oil and soybean meal

Month	Soybean oil: Average price at crushing plant	Soybean oil: Value from bu. of soybeans 1/	Soybean meal: Bulk price at Decatur	Soybean meal: Value from bu. of soybeans 1/	Value of oil and meal from bushel of soybeans 1/	Market price No. 1 Yellow soybeans Ill. pts.	Spread between soybean price and value of oil & meal
	Cts. per pound	Dollars	Dollars per ton	Dollars	Dollars	Dollars per bu.	Cents
Nov. 1960	10.0	1.10	44.50	1.05	2.15	2.05	10
Oct. 1960	9.3	1.02	48.95	1.15	2.17	2.04	13
Sept.1960	9.0	0.99	53.75	1.26	2.25	2.07	18
Aug. 1960	9.4	1.03	50.30	1.18	2.21	2.13	8
July 1960	8.9	0.98	50.75	1.19	2.17	2.09	8
Nov. 1959	8.0	0.88	58.50	1.37	2.25	2.09	16

1/ Based on assumption that a bushel of soybeans yields 11.0 pounds of oil and 47.0 pounds of meal.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil or soybean meal.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

4/ The monthly average price is the simple average of the daily closing prices.

WEEKLY SUMMARY AND STATISTICS

GRAIN DIVISION AGRICULTURAL MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 8 No. 49 Washington 25, D. C. December 9, 1960

WHEAT IRREGULAR - OTHER GRAINS ADVANCE

Wheat markets were mixed but other cash grains turned sharply higher during the week ended December 8. Upswings were due mostly to lighter offerings and partly to improved demand.

Winter wheat finished unchanged to a little weaker in the hard wheat area but went up 4¢ per bushel in the soft wheat area. Offerings of winter wheat remained light as farmers continued to hold down sales until the new income tax year begins. Domestic and export demand was active and generally very competitive. Spring wheat softened but durum wheat firmed up at Minneapolis. Export flour demand was still fairly active but domestic demand slowed in the spring wheat division. Lighter receipts of durum met improved demand as some mills had a backlog of orders to fill. White wheat firmed up behind active demand for light offerings at Portland. Rye was offered sparingly and gained 3¢ at Minneapolis.

Corn advanced 2-7¢ per bushel at principal markets as demand continued good and receipts slacked off. Country selling slowed as farmers found cover for most of their crop and colder weather lessened the danger of spoilage to high-moisture corn. Oats drew support from light receipts and strength in corn and finished 1-4¢ higher. Barley closed unchanged to 4¢ higher with better demand for light offerings. Grain sorghums advanced 6-8¢ per cwt. with good demand for tighter offerings. Strength in corn also gave some support to sorghums.

Soybeans advanced 5-9¢ per bushel. Country elevator supplies became limited as farmers all but stopped selling. Processors had enough beans for nearby needs but were unable to get replacements without upping their bids. Strength in soybean oil and meal markets and active exporting of beans and meal also added to the higher undertone for soybeans. Flaxseed went up 7¢ at Minneapolis, reflecting slow country selling and better markets for both linseed oil and meal.

GRAINS INSPECTED FOR EXPORT ... at Great Lakes ports for shipment either to Canada or directly overseas via the St. Lawrence Seaway from April (opening of this season's navigation) through November 1960 totaled almost 143 million bushels. This compares with 133 million bushels inspected during the same period of 1959. Of the 143 million bushels of grain inspected for export this season, nearly 91 million went directly overseas. The balance of 52 million bushels -- mostly wheat, corn and soybeans -- went to Canada either for consumption or for overseas shipment at a later date. Practically all of the 8.2 million bushels of wheat and 9.4 million of the 22.7 million bushels of corn shipped to Canada already have been transshipped to overseas destinations. However, nearly all of the 18.9 million bushels of soybeans shipped to Canada either have been consumed or are awaiting consumption or transshipment.

SOYBEAN INSPECTIONS FOR EXPORT ... continued at a heavy rate, with the total for the week ended December 2 at nearly 5.7 million bushels. This was second largest for any week of the current season, being exceeded only by the 6.4 million bushels inspected during the week ended November 11. However, it was well below the record 8.2 million bushels inspected during the comparable week a year earlier. Soybean inspections for export so far this season, October 1-December 2, totaled 39.6 million bushels compared with 35.8 million the same period a year earlier.

EXPORT SALES OF CCC-OWNED FEED GRAINS ... (corn, grain sorghums, barley, rye and oats) will again be permitted to Panama under the CCC Export Credit Sales Program. Under this program, agricultural commodities owned by CCC are offered for sale for export with payment deferred for periods up to three years.

P. L. 480 CORN PURCHASE AUTHORIZATION ... was issued to Chile recently to finance the purchase of about 10,000 metric tons of yellow corn, in bulk, Grade U. S. No. 2 or better, from U. S. suppliers under Title I.

Feed grain payment-in-kind export bids, December 2-8, 1960

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

4/ The monthly average price is the simple average of the daily closing prices.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

* See p. 10 for U.S. grains inspected for export from Canadian ports.

1/ July 1, 1960-December 2, 1960 for wheat, rye, oats, barley and flaxseed; October 1, 1960-December 2, 1960 for corn, grain sorghums and soybeans.

2/ For unrestricted domestic use except soybeans and flaxseed which are sold for domestic or export use at announced prices.

3/ Sales under Payment-in-Kind Program; not applicable to soybeans and flaxseed.

* Does not include 160,343 bushels of corn, 38,388 bushels of oats, 182,611 bushels of barley and 51,857 cwt. of grain sorghums sold under Livestock Feed Program.

Grain Market News

WEEKLY SUMMARY AND STATISTICS

GRAIN DIVISION AGRICULTURAL MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 8 No. 50 Washington 25, D. C. December 16, 1960

MOST GRAINS HOLD FIRM

Cash grain markets generally showed a firm trend during the week ended December 15. However, except for corn and flaxseed, net price changes were small. Trading became seasonally quieter with the approach of the holidays.

Wheat fluctuated within a narrow range and finished about unchanged in all divisions -- hard, soft, spring, durum and white. Prices were supported mainly by continued light offerings and fairly good domestic and export demand. Rye held firm at Minneapolis with receipts very light.

Corn went up 1-2¢ per bushel at most principal markets but finished 3-5¢ higher at St. Louis. Demand continued good. Receipts were moderate but not heavy enough to put any pressure on the market. Firmness in oats and barley reflected fairly good demand for light offerings. Grain sorghums held firm. Demand slacked off a little but so did offerings.

Soybeans closed a little firmer, supported mainly by continued light selling in the country, a fairly good rate of exports, and improved markets for meal and oil. Some CCC-owned soybeans moved to processors this week indicating that the cash price is about in line with CCC's selling price formula. Flaxseed buyers lowered their bids 6¢ per bushel in Minneapolis.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

4/ The monthly average price is the simple average of the daily closing prices.

Grain Market News

WEEKLY SUMMARY AND STATISTICS

GRAIN DIVISION AGRICULTURAL MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 8 No. 51 Washington 25, D. C. December 23, 1960

* *
* SEASON'S GREETINGS *
* *

SOYBEANS ADVANCE SHARPLY

Soybeans advanced 5-6¢ per bushel during the week ended December 22. Corn and oats ruled firm. Other cash grain markets were little or no different from a week earlier. Trading was seasonally dull.

Firmness in winter wheat reflected continued light marketings and good domestic and export demand. Spring wheat, on the other hand, weakened as larger receipts found buying spirits dampened by slow flour trade and the dull holiday market. Durum wheat, however, held steady behind quite good demand. White wheat held firm at Portland where light offerings were readily absorbed by exporters and dealers. Rye closed strong on extremely light receipts at Minneapolis.

Corn went up 2-4¢ per bushel at most principal markets but weakened at Minneapolis and Omaha. Strength reflected good demand for lighter receipts. Cold weather and snow curtailed country movement of corn. The weather also lessened storage problems and reduced forced marketings of high-moisture corn. The Pig Crop Report released this week indicated the 1961 spring pig crop would be 49.5 million head -- 5 percent above the 1960 spring pig crop. Oats gained 2-4¢ with good demand for light receipts, while barley remained mostly unchanged. Some malting type, however, was down 2¢ at Minneapolis where maltster demand was very limited and buyers were choosey. Grain sorghums were generally unchanged with very good demand for sharply reduced offerings.

Soybeans continued upward with the 5-6¢ per bushel advance attributed mostly to continued light country marketings, the heavy rate of soybean exports, and the strong market for meal which kept crushings at high levels. Flaxseed was unchanged at Minneapolis. Offerings were light but there was not a great deal of buying power in the market. Dealers were not anxious to accumulate supplies since movement of linseed oil has been slow and meal has not advanced in line with other oilseed meals in the feed ingredient market.

Special Features

	Page
Feed grains - payment-in-kind export bids	2
Crop production - annual summary	7
Wheat, rye, corn, oats, barley, grain sorghums, soybeans and flaxseed - amount under price support by States	8-11
Grains - amount under price support	12

A 1961 WINTER WHEAT CROP ... of slightly over 1 billion bushels was forecast by the Crop Reporting Board on the basis of December 1 conditions and other factors. This would be 7 percent smaller than the 1.1-billion bushel 1960 crop but nearly 25 percent larger than the 1950-59 average of 840.2 million bushels. It also would be the fifth largest crop of record. Seeding of the 43.9-million-acre 1961 winter wheat crop got underway relatively early and was completed rapidly under favorable fall weather. Indicated yield of 23.6 bushels per seeded acre for the United States is below the 1960 yield of 25.9 bushels but is well above the 17.6-bushel 10-year average.

RYE CONDITION ... on December 1 was reported by the Crop Reporting Board at 87 percent. This was 1 point above a year earlier and 4 points above average. It reflects generally good growing weather for the 4.2 million acres of rye sown for all purposes in the fall of 1960.

PRICE SUPPORT ACTIVITIES ... through November showed that farmers had put 364.7 million bushels of 1960-crop wheat under price-support loans and purchase agreements. A year earlier, they had put 270.4 million bushels of wheat under support. Of the 364.7 million bushels of wheat put under support this year, 271.9 million were warehouse-stored, 91.7 million farm-stored, and 1.1 million under purchase agreements. Farmers had repaid loans on 33.9 million bushels through November. Most of these were in Oklahoma (12.8 million), Washington (8.1 million), Texas (5.4 million), Kansas (1.6 million), Idaho (1.5 million), and Oregon (1.4 million). Substantial amounts of barley, corn, oats, soybeans, and grain sorghums also have been put under price support. (See details on page 12.)

EXPORT SALES OF FEED GRAINS ... (corn, grain sorghums, barley, rye and oats) will again be permitted to Italy and Japan under the CCC Export Credit Sales Program. Under this program, agricultural commodities owned by CCC are offered for sale for export with payment and interest deferred for periods up to three years.

Feed grain payment-in-kind export bids, December 16-22, 1960

Grain	Dec.-Jan. Export period		Feb.-Mar. Export period		Apr.-May Export period		Total	Cumulative Total 1/
	Quan.	Rate	Quan.	Rate	Quan.	Rate	Quan.	Quan.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

4/ The monthly average price is the simple average of the daily closing prices.

Grain Market News

WEEKLY SUMMARY AND STATISTICS

GRAIN DIVISION AGRICULTURAL MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 8 No. 52 Washington 25, D. C. December 30, 1960

GRAIN MARKETS GENERALLY FIRM

Cash grain markets were mostly firm with a generally good demand for light offerings during the holiday-shortened week ended December 29. Price changes were small with the biggest gain in corn and soybeans. Trading was quiet but there was good inquiry from exporters and feeders.

Wheat fluctuated within a narrow range with prices mostly unchanged from a week ago. Hard Winter wheat was unchanged at most markets while Soft Red gained 1¢ per bushel at Chicago. Receipts continued light with most farmers continuing to hold. Export demand was good for both wheat and flour. The spring wheat market was slow with only a fair demand, however, prices closed unchanged from a week ago. Durum prices were steady. In the Pacific Northwest White wheat averaged about steady in dull trading. The rye market was quiet with trading light.

Corn advanced 1-4¢ per bushel with a fair demand for light offerings. Receipts were small with most of the demand from feeders. Oats strengthened at Chicago with light offerings but were easier at Minneapolis. Demand for barley continued slow and prices were about unchanged. A good demand for light offerings advanced grain sorghum prices 2¢ per cwt.

Soybeans gained 6¢ per bushel with reports that CCC has virtually sold all but minor quantities of its inventory of take-over soybeans. Buying continued active with offerings limited. Flaxseed continued dull and unchanged with little interest.

Special Features

	Page
Feed grains - payment-in-kind export bids	2
Soybeans - inspected receipts by grades	7
Soybeans and flaxseed - supply and distribution, monthly	7
Wheat - supply and distribution in four exporting countries	8

WHEAT SUPPLIES ... in the four principal exporting countries (United States, Canada, Argentina and Australia) total nearly 4.3 billion bushels for the 1960-61 season. This is 340 million more than for 1959-60 and the largest of record. Most of the increase over last season is in the United States with supplies 256 million larger. However, Canada and Australia show increases of 65 million and 55 million respectively. A record crop of around 250 million bushels is now being harvested in Australia. Smaller supplies are indicated in Argentina. Unofficial reports indicated a moderate drop in production but the first official estimate shows a somewhat larger drop. Exports of wheat including flour from these four countries totaled around 490 million bushels July through December, based on boat loadings and other data. This is around 45 million more than in the same months of 1959 and 60 million above 1958. U. S. exports are placed at 240 million for the first 6 months of the season as against 205 million a year earlier. Canadian exports of 150 million are down slightly while exports from Argentina and Australia are both above a year earlier. (For more details see page 8)

DURUM WHEAT ... has been added to the classes of wheat eligible for export payments under the payment-in-kind export program for wheat it was announced December 27. A separate rate for durum wheat will be included in the daily announcement of export payment rates offered by the Commodity Credit Corporation on commercial exports of wheat.

P. L. 480 AGREEMENT WITH KOREA ... providing for the sale of $35.1 million worth (including certain ocean transportation costs) of U. S. agricultural commodities was announced December 28. Included in the agreement are approximately 8.7 million bushels of wheat, 113,000 bales of cotton, 2.0 million bushels of barley and 400,000 bushels of corn. Sales will be made by private U. S. traders.

Feed grain payment-in-kind export bids, December 23-29, 1960

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

4/ The monthly average price is the simple average of the daily closing prices.

1/ Carlot receipts have been converted to bushels on the basis that 1 carlot equals 1,750 bushels.

2/ Of the November receipts, 1,750 bushels were mixed, and the remainder Yellow soybeans. Inspections of soybeans in November included 14,910,799 bushels as cargo lots, 10,650,937 bushels as truck receipts, and the balance as carlot receipts. Based on reports of inspections by licensed grain inspectors at all markets.

Soybeans and Flaxseed: Supply and distribution

Item	Soybeans		Flaxseed	
	1960-61	1959-60	1960-61	1959-60
	--1,000 bushels--			
Carryover 1/	23,260	62,117	3,042	14,722
Production	558,778	533,175	31,101	21,890

1/ Does not include imported wheat, which for the United States totaled 7.8 million bushels in 1959-60 and averaged 7.9 million for the 5 years 1954-58. Imports into the other countries were generally very small.

* Preliminary estimates.

INSPECTIONS FOR EXPORT (Continued):

By classes and grades:
Wheat ..... Jan. 8; July 15

By grades:
Rye, barley, oats and flaxseed ..... Jan. 8; July 15

Corn, grain sorghums and soybeans ..... Oct. 14

PRICES:
Average cash prices for specified months ..... Jan. 29

Average farm prices, parity & support rates .. Feb. 5; Mar. 4; Apr. 1; May 6; June 3; July 1; Aug. 5; Sept. 2; Oct. 7; Nov. 4; Dec. 2

Corn, grain sorghums and soybeans:
Average farm prices ..... Oct. 7
Monthly average cash prices ..... Oct. 7
Rye, oats and barley: Specified Canadian and U. S. grades at Winnipeg & Minneapolis.. Aug. 5
Soybean prices compared with soybean oil and meal prices ..... Jan. 29; Feb. 12; Mar. 4; Apr. 1; Apr. 29; May 27; July 1; July 29; Sept. 2; Sept. 30; Oct. 28; Dec.2
Wheat, oats, barley, rye and flaxseed:
Average farm prices ..... July 1
Monthly average cash prices ..... July 1

PRICE SUPPORT:
Amount under price support, all grains ..... Jan. 22; Feb. 19; Mar. 4; Mar. 25; Apr. 22; May 20; June 24; July 22; Aug. 19; Sept. 23; Oct. 21; Nov.25; Dec. 23;
CCC dispositions ..... Jan. 8; Feb. 5; Mar. 4; Apr. 8; May 6; June 3; July 8; Aug. 5; Sept. 9; Oct. 7; Nov. 4; Dec. 9
Operations 1950 to date ..... Feb. 26
Quantity put under price support by States:
Wheat ..... Aug. 19; Sept. 23; Oct. 21
Wheat, rye, corn, oats, barley, grain sorghums, soybeans and flaxseed ..... Jan. 22; Feb. 19; Mar. 25; Apr.22; May 20; June 24; July 22; Nov.25; Dec. 23
Quantity under reseal programs ..... Dec. 2
Quantity of corn under reseal programs ..... Apr. 29
Rates at principal terminals ..... July 8
Wheat and flour export program rates ..... Jan. 15; Feb. 12; Feb. 26; Apr.8; May 13; July 1;July 29; Sept. 9; Oct. 7; Nov. 4; Dec. 16
Wheat flour and cornmeal shipments under Section 416 ..... Aug. 19
P. L. 480 shipments by country of destination ..... Aug. 19
Conservation reserve program 1956-60 ..... May 20
